A CONSTITUTIVE MODEL OF TWIN NUCLEATION AND DEFORMATION TWINNING IN HIGH-MN AUSTENITIC TWIP STEELS

Books On Demand Aug 2013, 2013. Taschenbuch. Book Condition: Neu. 211x149x2 mm. Neuware - In this dissertation, a multiscale dislocation density-based constitutive model for the strain-hardening behavior in twinning-induced plasticity (TWIP) steels is presented. The approach is a physics-based strain rate- and temperature-sensitive model which reflects microstructural investigations of twins and dislocation structures in TWIP steels. One distinct advantage of the approach is that the model parameters, some of which are derived by ab initio predictions, are physics-based and known within...

Read PDF A constitutive model of twin nucleation and deformation twinning in high-Mn austenitic TWIP steels

Reviews

This pdf is wonderful. It really is written in simple terms instead of hard to understand. It's been developed in an exceedingly simple way and it is just after I finished reading this ebook in which in fact modified me, alter the way in my opinion.

-- **Ollie Powlowski**

I just started out reading this ebook. We have read and so I am certain that I am going to gonna study yet again again in the future. I found out this book from my dad and I encouraged this publication to find out.
