

Industrial Electronics and Control (Technical Education Series)

By S. Chatterjee, S.K. Bhattacharya, Titi Chandigarh

Tata McGraw-Hill Education Pvt. Ltd., 2004. Softcover. Book Condition: New. First edition. **OVERVIEW** This book is designed keeping in view the syllabi of various states for the course in Industrial Electronics and control. It is presently the only book that covers the complete course requirement at the diploma level. Written in a comprehensive and lucid manner, this book deals with the principle of operation and applications of both the magnetic control devices as well as the electronic control devices as well as the electronic control devices, using thyristors. Apart from the control systems the book deals with semiconductor physics, applications of thyristor based control devices and industrial circuits. It also explains electronic control of heating, welding and solid state motor control circuits, these circuits have been verified and tested by experts, in the laboratory. **KEY FEATURES** * A complete chapter on Thyristors and their application. * Emerging use of Microprocessors in industrial Electronics discussed. * Original practical circuits used throughout the book. This would help teachers to set up experimental boards. * Variety of solved problems in each chapter to fulfil the needs of average students. * Appendix provided, giving details of component specifications and methods of their testing. * A...
