in the subject Engineering - Communication Technology, ,
language: English, abstract: Worldwide Interoperability for
Microwave Access (WiMAX) is a wireless communications
technology. As the global economy continues to expand, so does
the demand for information. This information needs to be
plentiful, diversified, instant, sprinkled and mobile, all at the
same time. These mounting demands have proven difficult for
existing network capacity, coverage and range also. And this
reduces an organizations ability to evolve with changing
business and workforce needs. Wireless networks are best suited
to meet these challenges because they are resilient, scalable,
mobile and cost-effective. It facilitates the network with high-
speed, high quality data, voice and video communication, even
when users are on the move. The rapid growth of WIFI in the
home, enterprise and public hotspot market has given users and
service providers alike a new glimpse into what wireless
connectivity can deliver, through a single interface, in multiple
locations. WIFI realizes the vision of broadband connectivity
within the LAN (Local Area Network) and has easy way for...
